

Date: 12/4-16

Facilitator: Philip Ekman

Participants: Emilia Vestlund, Razmus Strandell, Emil Hukic

1. Objectives (5 min). Resolve any issues preventing the team to continue.

- Domain model
- Finish RAD

2. Reports (15 min) from previous meeting

3. Discussion items (35 min)

We discussed how exactly the application should work so that we would all be on the same page. We also discussed and began to work on the domain model.

4. Outcomes and assignments (5 min)

We discussed how the application will work in general and how we will construct the domain model for the application. The group have low previous experience of Android development so this will be a tricky part during the development phase. We found some sources on the internet so we could study up on Android. Everyone in the group got an assignment to think about the looks of the application.

5. Wrap up

Next meeting will take place on Thursday 10:00 in Linsen.
