Date: 19/4-16

Facilitator: Philip Ekman

Participants: Emilia Vestlund, Razmus Strandell, Emil Hukic

1. Objectives (5 min). Resolve any issues preventing the team to   continue.

-We haven't started coding

2. Reports (15 min) from previous meeting

The domain model has been made.

3. Discussion items (35 min)

We discussed what use cases we were going to implement for the jUnit tests as well as started discussing who would do what parts of the implementation. We also discussed some additional features to add to our application.

4. Outcomes and assignments (5 min)

  We decided who would implement what parts of the logic for the different user cases.

5. Wrap up

  Next meeting will take place on thursday 14.10.
